Theme & Core Concept

活水 活城

LIVING WATER LIVING CITY

Water, the lifeline of the city.

Living Water

Smart water solution

Recycle and regeneration

Digital management

Living City

Resilient city

Efficient operation

Future-oriented

The flow of water drives urban vitality. Harnessing water's potential to build safer, more resilient, and sustainable cities.

HONG KONG WATER EXPO
香港水博會 2027

Event Highlights

1

Unlocking Global Trade with Precision Sourcing

By bringing together key industry players, leading suppliers, and international buyers under one roof, the exhibition serves as a comprehensive, one-stop global business networking platform. It streamlines business matching and trade negotiations, allowing participants to source cutting-edge solutions, explore strategic partnerships, and finalize high-value deals efficiently in a single location.

2

Unveiling Innovation, Converging Excellence

A premier launchpad for innovation, the exhibition provides a high-impact platform for frontline technology debuts and cutting-edge solution showcases. By gathering top-tier global suppliers and industry pioneers, the event offers direct access to market-leading advancements and transformative insights that shape the future of the industry.

3

Virtual Broadcast - Breaking Through Barriers

Through high-definition live streaming, the exhibition extends its reach beyond physical borders to deliver an immersive online viewing experience. Remote attendees can explore interactive virtual booths and tune into expert keynote sessions from anywhere in the world—ensuring seamless engagement and dynamic participation.

4

Max Reach - Amplifying Brand Voice

A powerful catalyst to elevate corporate stature and maximize brand exposure. By placing companies directly in front of targeted industry leaders, international buyers, and prominent media outlets, the event amplifies brand awareness across global markets.

5

Guided VIP Exploration, High-Quality Engagement

Gain direct access to key decision-makers and research pioneers via delegation tours for government officials, industry associations, leading global enterprises, and academic institutions. Offer a streamlined way to explore top-tier solutions, foster cross-sector partnerships, and stay ahead of critical industry trends.

6

Touring Excellence & Practical Insights

Inspect real-world, high-standard implementations in action, gain operational lessons from lead project engineers, firsthand experience into industry best practices and engage in meaningful knowledge exchange.

Event Advantages

Prime Location, Unlimited Global Connectivity

Positioned in Hong Kong - a premier financial hub and open economy backed by world-class commercial, legal, and financial frameworks - this exhibition leverages the region's unmatched strategic advantages. By gathering elite enterprises, institutions, capital, and top talent worldwide, we offer a dynamic global platform for the water industry to foster exchange, forge strategic partnerships, and seamlessly scale into international markets.

Synergy in the Greater Bay, Global Reach

Unlocking the seamless integrated advantages of the Guangdong-Hong Kong-Macao Greater Bay Area, this event connects deeply with international water agencies, overseas chambers of commerce, and global trade associations. Through a powerful "Greater Bay Area + Global" framework, we drive multi-tiered, multi-domain international initiatives - amplifying global influence and propelling the water industry into a new era of worldwide expansion.

Accelerating Transformation through Strategic Policy Dividends

Backed strong support from government and active global industry participation, this event aligns seamlessly with "Dual Carbon" goals and strategic water management guidelines. Focusing on cutting-edge sectors such as smart water systems, seawater desalination, wastewater resource recovery, and near-zero discharge, the exhibition serves as the premier platform for policy insight, benchmark technology debuts, and product showcases - empowering enterprises to capture first-mover advantages in the market.

Endorsed by Global Leaders, Driving Industry Recognition

Partnering with leading global water organizations such as the International Water Association (IWA), this event brings together top international experts, academic authorities, and industry leaders. Backed by world-class academic endorsement and professional authority, it significantly enhances global recognition and prestige for both the expo and its exhibitors. Hosting targeted matchmaking with domestic and overseas professional buyers and international delegations, the Hong Kong International Water Expo serves as an unparalleled gateway to high-value global commercial opportunities.

360° Media Exposure, Elevating Brand Presence

Featuring high-profile keynote speeches, panel discussions, tech showcases, and virtual expo tours, this event partners with top-tier domestic and international media, trade publications, and professional associations for in-depth coverage. Leveraging trade journals, specialized platforms, and social media channels, we deliver multi-dimensional publicity to showcase corporate brand identities and project cutting-edge innovations onto the global stage.

Scale of Exhibition & Targeted Audience

Scale of Exhibition

15,000+ sqm
Exhibition Area

120 - 150
Exhibitors

6 - 8 April 2027
Exhibition Date

Target Audience

Water Treatment Technology
Water treatment systems & solutions, advanced materials & water quality testing technology

Manufacturers and Suppliers
Pumps, valves & piping systems, membrane modules & associated equipment

Smart Water Solutions
AI, IoT, digital transformation and other water management solution providers

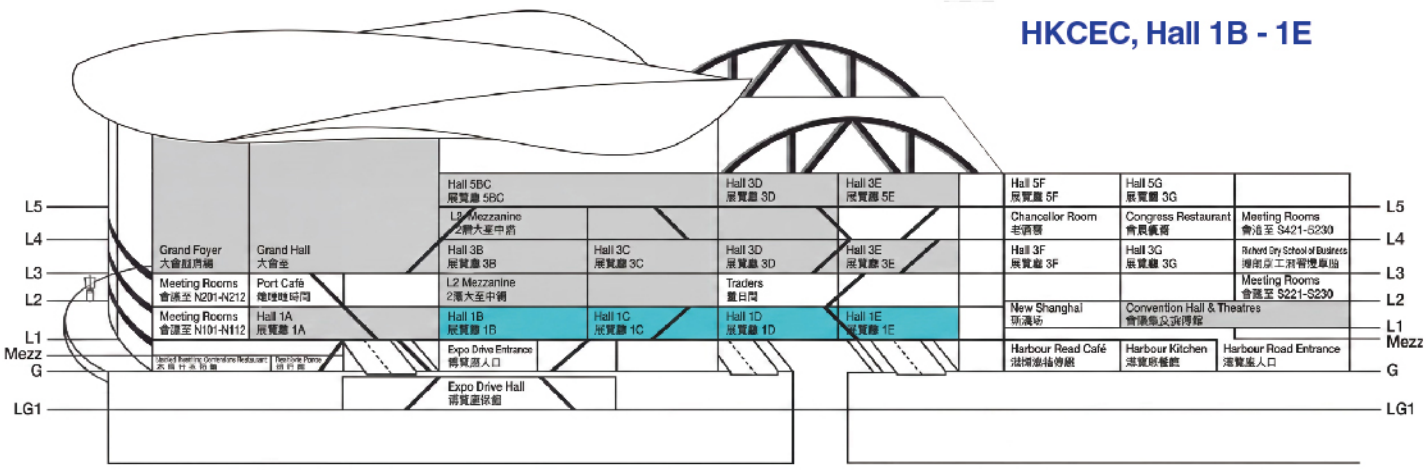

Engineering and Consulting
Water supply and drainage engineering design & consultancy, construction and project management services

Public Utilities
Utility companies of water supply and drainage management

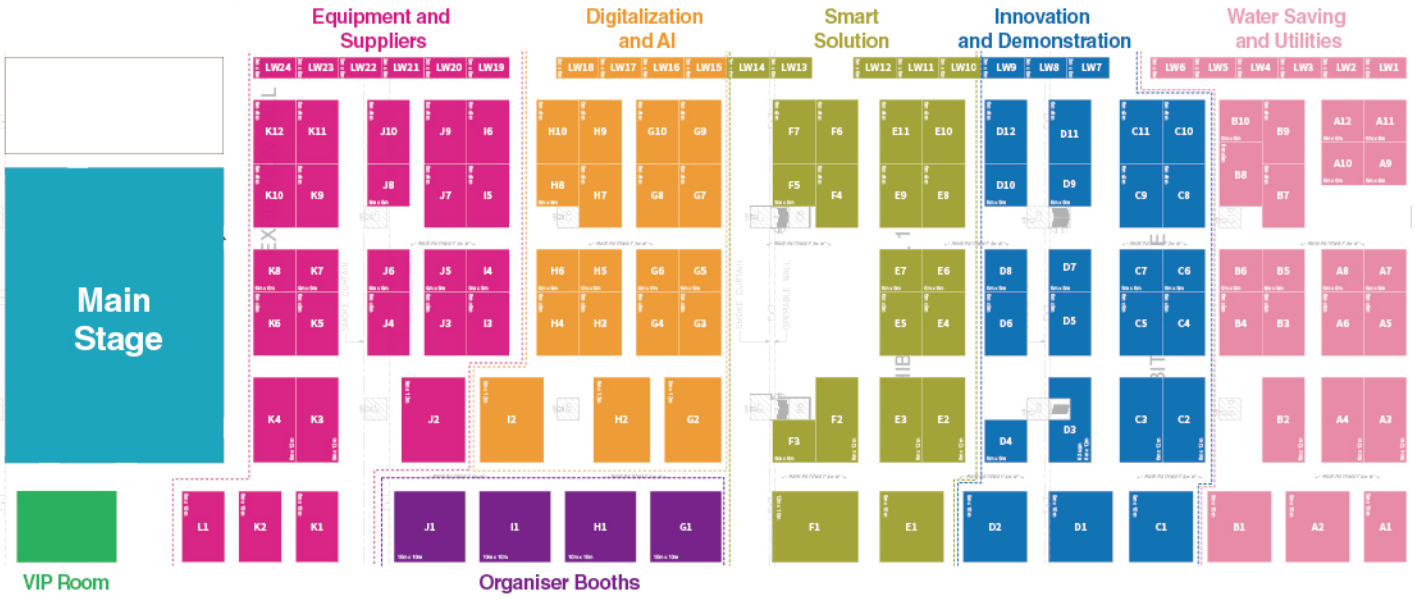

Government Agencies, Industrial Institutions, and Investors
Policy makers, industrial organizations, and infrastructure investors

Concurrent Events

IWA Global Utilities Summit

Held concurrently with the expo, this premier summit is a new flagship platform created by and for utilities, bringing together the senior professionals. The Summit will convene key decision-makers, innovators and practitioners from water, wastewater and stormwater utilities worldwide.

Water Conservation Industry Innovation and Development Annual Symposium

A platform to deepen collaboration on water conservation initiatives among cities in the Greater Bay Area and fostering the innovation and wider adoption of water-saving technologies.

Intelligent Pressurised Pipeline Robotic Challenge

Organized by Hong Kong water authorities in collaboration with research institutions, universities, and international representatives, this competition advances systematic pipe inspection technology and promotes the practical application of robotics and AI in water pipeline maintenance.

Exploring Water Culture : Legends, Traditions & Craftsmanship

Discover the profound significance and unique essence of water in Chinese culture. Designed for global guests, this feature showcases regional legends and traditional craftsmanship tied to water. Immerse in the rich diversity and far-reaching influence of Chinese water culture - a celebration where heritage meets global inspiration.

Other Concurrent Events

Parallel Sessions and Case Studies

Focusing on the frontiers of water tech, featuring successful urban water management case studies from domestic and abroad.

Corporate Networking and New Product Launch Events

An exclusive launchpad for exhibitors to unveil cutting-edge products and technologies to the market.

Business Matchmaking and Networking

Precisely matching buyers and suppliers to drive business collaboration and partnerships.

Related Past Events

8th IWA-ASPIRE Conference & Exhibition

Dates : 31 October - 2 November, 2019

Venue : HKCEC, Hong Kong

Attendees : 1,000+ professionals from around the world

Presentations : ~200 academic presentations

Topics : Water Supply Safety · Wastewater Treatment · Smart Water · Green Infrastructure · Water-Resilient Cities

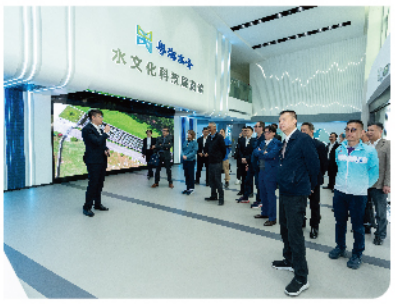

Highlights : 4 parallel forums · Technical tours of Hong Kong's water infrastructure · IWA-ASPIRE 2025 grew to 2,494 delegates

International Water Pioneers Summit

Dates : 1 April, 2025

Venue : Hong Kong Palace Museum

Attendees : Around 5,000 on-site and online participants including global renowned leaders, experts, academicians, senior government officials and stakeholders from water supply sector

Topics : High-quality development of water supply and technology; Water safety development; Building water security under "Belt and Road" initiative and Dongjiang water
